

WATER DUTY INSTRUCTIONS

PLEASE TAKE THE TIME TO READ ALL THE INSTRUCTIONS BEFORE BEGINNING

1. *Remove both hose reels and the green hose from the shed.*
2. *Pull each of the reels and the green hose through the garden gate.*
3. *Leave one of the reels just beyond the pathway about halfway between the gate and the old parking lot.*
4. *Pull the other reel and green hose though the field almost as far as the Frost fence near the YMCA exit door.*
5. *Walk around the frost fence with the green hose and enter the YMCA garage.*
6. *If the side door is locked proceed to the main desk in the lobby of the YMCA and ask the desk staff if they can get someone to unlock the door or proceed down to the garage and ask the attendant if they could unlock the door. As a worse case situation the hose can be pushed under the door.*
7. *Connect the green hose to the tap in the garage next to the side door of the YMCA.*
8. *Pass the green hose through the frost fence and connect it to the reel. Be careful to connect the green hose you brought from the shed to the short green hose on the reel.*
9. *Pull the long black hose on the reel back towards the garden. Try to walk as directly as possible towards the garden. Aim for the space between plot # 1 and plot # 8.*
10. *Connect the black hose to the short green hose on the second reel.*
11. *Pull the black hose from the second reel into the garden and beginning filling the barrels. If you have done it correctly, the black hose should reach all of the barrels. If not don't worry; there should be another hose in the shed to help you out.*
